

Automate SAP supplier invoice coding with Snowfox.

Without AI, 80% of non-PO invoices in SAP are coded manually costing €4–8 per invoice. Snowfox connects AI-powered coding predictions directly into your existing SAP workflow, with no new system and no new UI.

WHAT SNOWFOX DOES

Snowfox automates purchase invoice coding and approval flow routing with self-learning AI, as an add-on module to your SAP setup. The AI learns your unique coding rules from historic invoice data, with no rules to build or maintain, and connects into your SAP workflow without replacing it.

KEY BENEFITS

- Automate up to 90% of your purchase invoice coding
- Save €2–4 or 3–6 minutes per invoice
- Faster invoice processing, fewer late payments
- Improved coding quality and consistency
- Faster month close
- Zero changes to your existing SAP workflow
- Continuous learning: accuracy improves over time

HOW IT WORKS

01

Connect. Snowfox integrates with SAP causing zero changes to your existing SAP workflow.

03

Predict. Snowfox populates GL accounts, cost centers, tax codes or any other dimension you use for coding.

02

Learn. AI analyzes your historic invoice and coding data to learn your coding practices.

04

Approve. Predictions appear directly inside your SAP approval flow saving 3–6 minutes of processing time per invoice.

WHY CHOOSE SNOWFOX

- Easy implementation
- Dedicated Customer Success Manager
- Thousands of customers
- Comprehensive analytics and management tools for AI optimization and transparent monitoring
- ISO 27001 certified
- The most accurate invoice coding AI
- Developed for over 10 years

"The service level has increased, and employee satisfaction in the accounts payable department has improved. Staff input is being used much more efficiently than before Snowfox."
